2. External renovation works of the dormitories:

- The holes filled in the territories of the parking lots at the dormitories.

3. Amendments of the internal procedure

- Taking into consideration the requests of the representatives of the dormitory council, the Dormitory Rules of Internal Procedure are amended, the time for the use of laundry rooms, studying, recreation and use of the bicycle storage premises, as well as visiting hours of the guests are extended.

- Dormitory reservation system for the foreign students started to function, guidelines for allocation at the dormitory for the foreign citizens was prepared;
- Dormitory column created in the University's Academic Information System (AIS); the residents can login and see the disciplinary measures imposed on them (including their validity terms) and other information related to the living at the dormitory;
- Resident information guides are prepared for the first year students, newly accommodated students, newly arriving foreign students and newly accommodated foreign students.

We aim to constantly improve the quality of the accommodation services therefore we will continue the modernisation and renovation works this year. In order to consider the needs of the residents, the requests and remarks provided by the Dormitory Council are taken into consideration while planning the renovation works for 2019.
