- Computer network improvement works carried out: the main network commutator has been replaced, the main entrance commutators of the majority of the dormitories were changed to increase the speed of the Internet connection;
- Improvements of wireless Internet connection made by installing additional access points in the dormitory 5.

### **2. External renovation works of the dormitories:**

- The holes filled, special partitions equipped and parking lines scratched in the territory of Vydūno avenue parking lot at the dormitories;

- Benches provided in the territory of the dormitories 5, 14 and 15.

### **3. Amendments of the internal procedure:**

- The section for dormitory applications is now active in the University's Academic Information System, making it possible to fill all the requests related to the residence at dormitories online;
- A monthly electronic newsletter is emailed to all the residents of dormitories on the first Wednesday of each month providing the most relevant news and realities related to the residence at dormitories;
- Information videos on the relevant issues of accommodation and residence at dormitories have been prepared and are available on the website [dormitory.ktu.edu](http://dormitory.ktu.edu);
- Video guides on maintaining cleanliness in the residential and common premises have been prepared; they will help the residents to maintain a more pleasant, cleaner and more attractive environment at the dormitories;
- To ensure more effective cleanliness and tidiness in the residential premises, a new additional service – final cleaning – is now provided to the residents who are moving out from the dormitory.

We aim to constantly improve the quality of the accommodation services therefore we will continue the modernisation and renovation works this year. In order to consider the needs of the residents, the requests and remarks provided by the Dormitory Committee are taken into consideration while planning the renovation works for 2020.
